

Rockaway, NJ SYSTEM ANALYST, B2B AND DISTRIBUTED SYSTEMS

This position is responsible for providing support resolution services for a Sterling Integrator (SI) B2B/EDI environment. The individual will participate in all EDI development projects, promoting and upholding quality standards throughout the software development life cycle. They will work with business units to analyze integration needs around various systems and applications; develop integration requirements for new technologies, platforms, architectures and/or computing environments and ensure they align with our IT strategy; and assist in developing programmatic solutions for complex business problems and issues.

About Warner Chilcott

Warner Chilcott is a leading specialty pharmaceutical company currently focused on the women's healthcare, gastroenterology, dermatology and urology segments of the U.S. and Western European pharmaceuticals market. It is a fully integrated company with internal resources dedicated to the development, manufacturing and promotion of its products. We have established strong franchises in women's healthcare and dermatology through our marketing techniques and specialty sales forces. We believe that our proven product development capabilities, coupled with our ability to execute acquisitions and inlicensing transactions and develop partnerships will enable us to sustain and grow our business.

The individual will be responsible for the following activities:

- Performing production support and maintenance task on SI environment
- Interface with customers, business partners, third-party suppliers/vendors, internal IT application programmers and internal business contacts for both new development and problem determination/resolution
- EDI Mapping design and development for EDI ANSI X12 and EDIFACT transaction sets
- Develop translation objects (maps) for the following data source/targets: EDI, XML, Application File, Database
- Business processes (BPML) development and modification.
- Develop and perform unit and integration tests for SI objects.
- Develop application integration interfaces using various SI adapters.
- Support and implement EDI communications protocols including VANs and AS2.
- Analyzing / Defining customer requirements

- Produce documentation and procedures regarding the proper use and operation of the corporate EDI & B2B infrastructure
- Utilize the corporate problem management tool to track open tickets and follow up to resolution and closure
